BOHDAN BATS

Full Stack Developer (.NET, React)

Lviv, Ukraine | batsbohdan@gmail.com | LinkedIn | Telegram | GitHub | WebSite

---

Full Stack developer with 5+ years of commercial experience building multithreading and scalable backend, desktop, web, and mobile applications using React, JS, C#, .NET, ASP .NET Core, MVC pattern, REST API, PostgreSQL, Python, .NET MAUI, and Flutter. Experienced in migrating legacy systems to modern frameworks, implementing CI/CD processes, and deploying large-scale production applications. Focused on integrating AI capabilities and automation into production systems. Experience spans fintech, productivity, file-sharing, and edtech domains.

Alongside full-time development work, personally designed, built, and shipped an AI-powered productivity app as Founder and Tech Lead - owning everything from architecture to hands-on implementation - and currently teach software engineering and programming at the college level, combining product ownership, engineering, and mentorship.

SKILLS

Backend: C#/.NET 10, ASP .NET Core, LINQ, Entity Framework Core, ASP.NET Core, Kubernetes, RabbitMQ, REST API
Databases: SQL, NoSQL, PostgreSQL, MongoDB, MS SQL Server, SQLite, MySQL
Frontend: React, JavaScript, Flutter, .NET MAUI, HTML, CSS, LESS, UI-design, Material UI
AI: Cursor AI, LLM, Claude, ChatGPT, Gemini, OpenAI API, Microsoft Agent Framework, Semantic Kernel, AutoGen
Programming languages: C#, JavaScript, TypeScript, Python, Dart, C++
Architecture: MVC, SOLID, OOP, Microservices, Modular Monolith, MVVM
Cloud & DevOps: CI/CD processes, Azure, Google Cloud, Docker, Git, Jira, GitHub Actions
Testing: xUnit, NUnit, MSTest, Unit testing, Integration testing
Tools: GitHub, Git, Jira, BitBucket, GitHub, SignalR, Google Cloud Platform

WORK EXPERIENCE

BookSoft - Full Stack Developer **Nov 2022 – Present (4 years)**

FinTech (accounting), Full-time

- Implemented and published website with Next, GitHub Actions: https://docs.booksoft.com.ua/
- Developed and maintained full-stack features for a production accounting application, a modern Ukrainian alternative to 1C.
- Developed over 20 responsive interface modules using React, TypeScript and SQL, reducing the loading time of key pages by 35 per cent.
- Accelerated the migration of the database infrastructure from MS SQL Server to PostgreSQL by 70%, increasing query performance by 40% and reducing licensing costs by ~₴150,000 per year.
- Implemented AI-assisted development processes (development of new modules, code reviews, bug fixes), accelerating the release of new features by 400% and bug fixes by 1 000%.

Tech stack: .NET, C#, JavaScript, React, PostgreSQL, ASP.NET Core, TypeScript, HTML, CSS, LESS, PostgreSQL, MS SQL Server, Docker

Principles: Habits for Goals - Founder & Tech Lead **Dec 2022 – Present (3 years 11 months)**

Productivity, Independent product, 5-8 hours per week

- Led architecture, hands-on implementation, code reviews, release management, and backlog prioritization across the product lifecycle.
- Built an ASP.NET Core / EF Core backend with PostgreSQL and Azure services; React is included in the product technology stack.
- My team successfully launched an AI-powered productivity app. It has an average rating of 4.95 out of 5 in the app stores.
- Integrated Azure OpenAI into key product features, which increased user retention by 20%.
- Migrated the mobile client from .NET MAUI to Flutter, whilst keeping the backend on ASP.NET Core - reducing the development time for new screens by 15 000% thanks to AI and Flutter framework.

- Implemented AI-assisted development processes, reducing the average time to release new features from 1 month to 10 days.
- Was solely responsible for the full product lifecycle: architectural decisions, code reviews, releases and backlog prioritisation.

Tech stack: React, PostgreSQL, C#/.NET 10, Azure, OpenAI API, .NET MAUI, Flutter, ASP.NET Core, EF Core, Google Cloud Platform, PostgreSQL, MS SQL Server, Docker, MVVM

LightUpon.Cloud - .NET Developer **Mar 2021 – Nov 2022 (1 year 9 month)**

File-sharing app, Full-time

- Successfully developed a Windows desktop application for file sharing.
- Developed a Discovery Service for peer-to-peer communication between devices, reducing the time taken to discover new nodes on the network from ~10 seconds to 2 seconds.
- Improved the application's stability, reducing the crash rate by 45% within three months of release.
- Participated in architectural discussions and the implementation of new features.
- Maintained and improved the application's existing functionality, reducing the average bug turnaround time from 5 days to 2.

Tech stack: .NET, C#, Docker, WPF, xUnit

LANGUAGES

English - B1 (Intermediate), in progress
Ukrainian - Native

EDUCATION

Ivan Franko National University of Lviv
Bachelor of Computer Science | 2018 – 2022

National Forestry University of Ukraine
Master of Computer Science | 2022 – 2024

CERTIFICATIONS

AI TECHNOLOGIES **06/2021 - 07/2021**
Ivan Franko National University of Lviv

ENTITY FRAMEWORK CORE IN DEPTH **08/2020 - 10/2020**
Udemy

VOLUNTEERING & LEADERSHIP

Ivan Filipchak Sambir College **09/2025 - Present**

Programming Teacher, Military exemption, a few hours per week

- Deliver lectures and practical classes on modern software engineering and programming.
- Develop educational materials and practical assignments; teach OOP, web development, databases, and software architecture.
- Supervise student diploma projects and internships, providing technical guidance from proposal through delivery.
- Mentor students in building production-grade applications.

Tech stack: C#/.NET 10, React, Blazor, Entity Framework Core, PostgreSQL, Java Script, CSS, HTML, Flutter
